

SKILLBUILDERS GROUP PROGRAMME

LANGUAGE BUILDING SUPERSTARS

For children aged 7 to 9 years

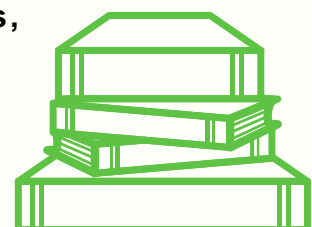

Designed and facilitated by our Speech Pathologists, the Language Building Superstars Group supports children to develop their vocabulary and formulate clear, meaningful and detailed sentences through fun, interactive activities.

The group will target:

- Learning and using a wider range of vocabulary
- Formulating complete and meaningful sentences
- Adding adjectives to describe people, places, objects and events
- Using adverbs to explain how, when and where actions occur
- Expanding sentences to include more information and detail
- Sequencing and connecting ideas
- Applying sentence-building skills within short narratives
- Building confidence when expressing and sharing ideas

Children will practise these skills through games, visual activities, creative tasks and supported group discussions in a safe and encouraging small-group environment.
